

Crafted with care in the USA from recycled cotton.

Locally Made. We are proud to create a product that is made in the U.S.A. The sock designing, yarn manufacturing, knitting, and finishing final touches are completed at small, family-owned businesses in Vermont and North Carolina.

Eco Friendly. Our socks are knit from 100% recycled materials. The cotton yarn is created by recovering scraps from the production of cotton products, mainly t-shirts.

Using 100% recycled yarns has many benefits. By using recycled yarns, Solmate Socks decreases the amount of water, chemicals and by-product wastes of manufacturing, reduces CO₂ emissions, and helps to reduce the demand for new cotton crops.

Our recycled yarns are certified by Made in Green and Oeko-Tex. Certification requires that our materials are free from harmful substances, made with respect for the environment, and with respect for human rights.

Renewable Energy. Solar panels installed on our roof in 2010, power our headquarters for much of the year.
